

Hi John,

Over 9,742 people (that I know of) bought into the "Local Marketing" craze.

You know what I'm talking about. Right?

The "go sell your how to sell on the Internet services to local businesses who don't know how to sell on the Internet and make a fortune" courses.

There are only 3 credible local marketing systems that I know of (and you like me may own one or all of them):

1. The original, David Preston's "Online Cash Cow"
2. Kevin Wilke's "Local Business Money Machine"
3. Mike Koenig's "Main Street Marketing Machine"

Obviously, we believe local business marketing is a great business model and still a HUGE untapped potential, and me and my buddy/business partner Josh were talking about how people are actually seeking us out and our own local marketing business is growing EVERY SINGLE DAY across two states!

But you may be in the vast majority of people who bought one of these local marketing systems and just couldn't quite make it work.

- Or maybe you actually got a few clients but keeping up with the work is like a full-time job.

- Or maybe you got a few clients and what you're doing for them isn't quite getting results, so you know they are gonna cancel soon.

Before I go on, let me say if you bought any of these systems you have in your hands some of the best "how to" courses I have ever seen. All 3 are GREAT. (Even better when used together).

The thing is - like a diet plan, or exercise program, or prescription drug, or physical treatment for an illness, even the best systems don't work for everyone.

It's absolutely not your fault if you're stalled or stuck or can't make it work.

But if you're stuck, you are in luck!

Just a few days ago Josh and I were talking and we came up with a killer idea that may help you. And we want to share our cool new idea with you, but there's no way we can explain it all in an email.

So. . .

If you own ANY of these systems and it's not quite working for you, we want to offer you a unique solution that we have come up with just for you.

Here's where we explain our idea:
